## **Grove Street H.I.V.E. Founding Principles**

The Grove Street H.I.V.E. is a community space founded to build and promote progressive communities in Greensboro with a special focus on the Glenwood area. Everyone using the space is asked to accept and abide by the Vision Statement.

## The HIVE Vision Statement

### **What It Is**

The HIVE is a community center established to foster relationship building, dialogue, and resource sharing among individuals, groups, and communities working to build grassroots democracy and community power in and around Greensboro, North Carolina.

### **What It Does**

The HIVE believes that people and communities have a right to dignity, safety, health, sustainability, and self-determination. Therefore we are striving to:

- Develop and strengthen community-based participatory democracy;
- Actively confront and challenge all forms of oppression;
- Celebrate the diversity among us and recognize that we have a lot to learn from each other;
- Foster education and dialogue that emphasizes self-empowerment and recognizes the real world needs of individuals and communities;
- Provide a venue for cultural and artistic expression;
- Build healthy, ecologically sustainable communities;
- Support an economy based on localism, fairness, and mutual aid.

### **How It Works**

Though self-reflection and accountability, we are committed to growing and changing this community center to meet the needs of those who access it.

Decision-making is done through a cooperative process where each voice is heard, respected, and incorporated into the outcome.

All people and communities working towards progressive social change are welcome and encouraged to get involved.
